EXPERIENCE

Product Owner | OTConsulting

Retail IT Operations MMFG

Reggio Emilia, Italy | 06/2025– on going

- Managed a 40+ item **product backlog aligned to retail business goals**, driving feature delivery prioritization for a retail Promotion Management System used across Europe, USA, and Hong Kong.
- Defined more than 60+ **user stories with acceptance criteria and UAT test plans, A/B Testing**, reducing development rework by ~15% and improving sprint clarity for a 10-developer team.
- Led **Sprint Planning, Review, and Retrospective** ceremonies across 10+ sprints, achieving a 10% improvement in team velocity and consistent on-time delivery.
- Coordinated scope and iterative releases across 15+ business stakeholders and 10 concurrent retail projects, introducing Agile practices that reduced delivery delays by ~10%
- Produced functional specifications, release documentation, and operating procedures supporting POS/CRM retail system rollouts.

Middle Business Analyst | OTConsulting

Retail IT Operations MMFG

Reggio Emilia, Italy | 03/2024– 06/ 2025

- Led business process improvement introducing **process and system analyses assets** for the Fashion retail area within OMS initiatives, including critical brand and country activations — reducing BA process inefficiencies by 40%.

- Elicited, **prioritized, and validated 200+ business, system, and user requirements** in partnership with business and IT teams, ensuring alignment with retail operational needs and technical boundaries for OMS (order management system)
- Developed and **enforced standardized operating procedures (SOPs) for the BA retail team**, reducing process inconsistencies across the Fashion area by 30%.
- Supported retail system delivery management: collected business requests, analyzed POS and in-store product requirements, and proposed application solutions to satisfy business needs.
- Created training materials and delivered training sessions to end users on retail system processes and procedures.

Requirement Engineer | RE:Lab

Infotainment Systems Bugatti RIMAC

Modena, Italy | 05/2023– 03/ 2024

- Developed and managed system requirements (SYS.02) for infotainment controller features, ensuring alignment with overall vehicle architecture, customer needs, and product quality standards.
- Collaborated with cross-functional teams (HMI) to gather, analyze, and document infotainment requirements in compliance with the ASPICE standard

Junior Business Analyst | Spindox

Digital Division Autonomotive Ferrari Spa

Modena, Italy | 01/2022– 05/ 2023

- Led more than 10+ **requirements-gathering workshops** translating stakeholder needs into prioritized user requirements.
- Managed documentation, delivery timelines, and project status reporting across 3+ IT initiatives, improving delivery visibility and on-time feature completion.
- Reviewed wireframes and UI/UX specifications across 2+ digital products for dealerships across Europe, improving usability and consistency.
- Defined and maintained **40+ end-to-end test cases** covering functional and user requirements, supporting successful UAT and system acceptance testing.
